PROFILE

Detail-oriented Web Designer and Developer with expertise in software installation, troubleshooting, and information systems operations. Passionate about creating innovative, user-centric digital experiences through coding and design. Committed to continuous learning and leveraging technical skills to deliver high-quality, impactful solutions that drive user engagement and satisfaction.

WORK EXPERIENCE

Web Designer

E-Rehab LLC. | May 2022 - April 2025

- Expertise in WordPress development, building custom websites with HTML5, CSS3, UIKit, and Less.js
- Skilled in creating responsive, mobile-first designs using CSS3 media queries, PHP, and dynamic layouts
- Proficient in UI frameworks (UIKit 2/3) to design clean, user-friendly interfaces
- Applied modern design trends, including hero video headers, gradients, and duotones
- Integrated SSL certificates for enhanced website security and safe data transmission
- Involved in the full development cycle, from client requirements to wireframing and QA testing
- Focused on site optimization for speed, scalability, and improved SEO performance
- Ensured design consistency and brand alignment across all projects
- Continuously tested and iterated on designs to enhance user experience and functionality

Web Developer - Webmaster

My Creative Panda | Jan 2018 - May 202

- Custom WordPress theme/plugin development, performance optimization, and functionality management
- Designed intuitive, responsive, mobile-first UI/UX for websites
- Conducted security assessments, penetration testing, and server troubleshooting
- Enhanced website speed and reliability through caching and optimization techniques
- Ensured cross-browser/device compatibility for consistent user experiences
- Managed backend integration, API setups, and smooth content migration
- Developed WooCommerce stores, integrated payment gateways, and optimized product management
- Conducted SEO audits and implemented strategies to improve organic rankings and traffic
- Implemented backup/recovery plans to ensure data integrity and quick restoration
- Configured DNS, domain, and email management for clients
- Provided prompt troubleshooting and client support to maintain website operations
